

ChatGuard

A product of
AXTRADE SAS

Turn your chat archive into **desk intelligence** — and **audit-ready compliance**.

Regulated firms already store millions of Bloomberg chats, emails and calls — yet get nothing back but risk. ChatGuard reads that record and makes it work twice: faster trading desks, and audit-ready supervision.

\$3.5bn+

SEC/CFTC/FINRA off-channel
fines since 2021

£52.8m

FCA fines, 2023

Desk Intelligence

- RFQ / quote / fill extraction from free-text chat
- Deal reconstruction with time-to-quote & time-to-fill
- Counterparty analytics — hit rate & sentiment
- Open follow-ups so commitments never slip
- Unified search + JSON/CSV export to BI

Compliance & HR

- Immutable, tamper-evident archiving (5y+)
- Alerts mapped to market-abuse typologies
- Off-channel & information-barrier detection
- HR investigation toolkit with evidence trail
- One-click regulator audit packs (FCA / FINRA)

HOW IT WORKS

1. Capture

2. Parse & classify

3. Enrich & reconstruct

4. Dashboards · alerts ·
audit packs

Deployed inside your perimeter. Encrypted end-to-end · self-host or private cloud · role-based access · full reviewer audit log. Channels: Bloomberg IB chat, email, voice & approved messaging — Bloomberg capture via Bloomberg Vault.

See what your conversations have been telling you.

Book a 20-minute walkthrough on your own data.
